Who We Are

M

Military Images is America's only magazine solely dedicated to the study of photographs of Civil War soldiers. Established in 1979, our ongoing mission seeks to showcase, interpret and preserve these rare images. The portraits were originally personal, intimate objects never intended for public consumption. Beginning with the centennial of the Civil War, these relics have moved from attics and basements into private and public collections. Today these surviving images are treasured artifacts that tell the story of the United States during our greatest struggle for survival as a nation. Members of *MI* have access to a mix of analysis, case studies, examinations of material culture and personal stories to gain a unique perspective on human aspects of the war.

For more than 40 years, the cover of our magazine has featured rare and unpublished photographs of the Civil War generation. These examples reveal the enduring power of these timeless images.
